TRADER JOE'S: HELP CURB A MAJOR PUBLIC HEALTH CRISIS

FACT: 80% of the antibiotics sold in the U.S. are used by the meat and poultry industries so factory farm animals can grow faster and tolerate crowded and unsanitary conditions.

This practice creates drug resistant “superbugs” on farms, which can spread to humans through the environment and the meat we buy, and makes the antibiotics we all depend on less effective.

WE'RE CALLING ON TRADER JOE'S TO BE AN INDUSTRY LEADER AND STOP SELLING MEAT FROM ANIMALS RAISED ON ANTIBIOTICS.

As a progressive retailer that has already demonstrated care for their customers' health by saying no to GMOs, artificial colors, and trans fats, Trader Joe's should take the obvious next step by helping move the livestock industry in the right direction – towards healthy animals raised without drugs.

Tell Trader Joe's to stop selling meat raised on antibiotics at **800-221-2063**.
